

# L' AUDITORI

## SALA 1 PAU CASALS

Despite his huge capacity and surface area, the Pau Casals Hall offers exceptional acoustic conditions (thanks to the collaboration between Professor Higiní Arau and the architect of L' Auditori, Rafael Moneo).

In addition, the hall can have different layouts, although vision is always perfect from anywhere, and it boasts technical features such as equalized sound depending on hall layout, lighting with mobile lamps; technical booths and an elevator for lifting pianos and other materials directly from the store to the stage...

**Volume: 24300 m<sup>3</sup>**

**Capacity: 2.326 localities**
