Thanks and appologies

Desart Eric

Hi All

Due to a stupid problem I had (and didn't notice until tonight) with an wrong login setting related to my Email account specially used for the newsgroups, a lot of incoming Email (only the ones related to newsgroups) was stuck for a few weeks at my ISP.

Therefor I apologize to everybody, to which I didn't respond, or who couldn't get in, it wasn't nonchalance.

Also the capacity of my inbox was exceeded, so I know at least from 1 person that only part of his mail came through.

The problem is solved now.

Many thanks to Higini ARAU puchades author/creator of the Acoustica paper and room-acoustic formula I asked for, for his extensive (partly received) Emails.

Thanks to Bob Cain and some others for their kind responses.

My "Noise Decay - Room radius" paper.

Many thanks to Eberhard Sengpiel (and a few others), for his extensive comments, causing some improvements on page 2 and an additional appendix, going deeper in the physical relationships between intensity (ρ , specific impedance etc.), pressure and power.

The new version will be downloadable in ca 1 week (new version d.d. 2 Aug, will be noted on the site, so one will see it's the new version).

Thanks to all for the visits to my site and the interest showed by the number of downloads.

Kind regards to all.

Eric Desart
