The [International Congress in Acoustics 2013](#) comes to its end. More than 1 600 works have been presented, and about 2 300 researchers, engineers and other acoustics professionals have attended the event.

La Salle Acoustics has had an active participation.

Dr. [Xavier Valero](#) has presented the paper entitled "Automatic classification of road vehicles considering their pass-by acoustic signature", coauthored with Dr. [Francesc Alias](#).

It has also been presented the work of Dr. [Higini Arau](#), professor of the [Master in Acoustics](#) of La Salle, entitled "The reverberation radius (rH) in an enclosure with asymmetrical absorption distribution", coauthored with Dr. [Umberto Berardi](#).
